

EPA Vapor Phase

Library Listing – 3,300 spectra

This library provides a focused collection of gas phase spectra of interest in environmental monitoring. It contains materials selected for inclusion by the US Environmental Protection Agency (EPA).

The EPA Vapor Phase Library was acquired by the Environmental Protection Agency (EPA) in the late 1970s and early 1980s. The collection of 3,300 gas phase spectra was collected with a heated gas cell. The library includes the IUPAC (International Union of Pure and Applied Chemistry) chemical name and the WLN (Wiswesser Line-formula Chemical Notation) code.
