

Industrial Coatings

Library Listing – 1,961 spectra

This library is a valuable resource for commercial and industrial laboratories. It includes a wide-range of spectra of monomers, polymers, plasticizers, extenders, solvents, pigments, surfactants and other additives. The samples were prepared as capillary films or melts on KBr, cast films on KRS-5, or pressed KBr pellets. No Nujol spectra are included.

The Industrial Coatings Library consists of 1,961 spectra listed by their trade names and was prepared in cooperation of Dr. Hebe B. Greizerstein of EB Associates Laboratories.
