

Nicolet Standard Collection of Raman Spectra

Library Listing – 3,119 spectra

This collection is suited to the needs of analytical services and investigational laboratories. It provides a wide array of common chemicals in a lower cost package that can be used in combination with the Nicolet Standard Collection of FT-IR Spectra to provide analysts a higher degree of confidence when identifying unknowns.

The Nicolet Standard Collection of Raman Spectra includes spectra of common chemicals with representatives of major functional groups and combinations of functional groups. It contains the same chemical series available in the Nicolet Standard Collection of FT-IR Spectra. These matched libraries can be used alone or in combination with Thermo's unique OMNIC Linked Search software. (See the FT-IR and Raman Matched Library section for more details.)
